

In the Drawings

In accordance with 37 C.F.R. § 1.121(d), enclosed herewith on a separate sheet is a proposed amendment to FIG. 1 in red ink, filed for approval by the examiner.

In the Claims

Please cancel claims 1-14 and add new claims 15-25 below:

15. A single-use feed bottle made of plastic materials, the bottle including a body for holding a quantity of milk or other liquid, the body having a mouth, which is sealable in a fluid tight manner by means of a screw-threaded closure, the closure and the body having on their inner and outer surfaces respectively mutually cooperating formations to cause the closure to be irremovable from the body after the closure has reached a limit position on the body, in which it forms a fluid-tight fit with the body, and in which a ^{lug} flange of smaller diameter than the inner diameter of the mouth of the body and the closure ^w form an integral unit.)
16. The bottle of claim 15, wherein the mutually cooperating formations comprise a set of ratchet teeth on the closure, which cooperate with ^a lug carried by the body.
17. The bottle of claim 16, wherein the lug of the body is provided by one set of ratchet teeth on the body.
18. The bottle claim 15, wherein the bottle is made by aseptic process.
19. The bottle of claim 15, in which the body is made of polypropylene and formed by an injection-molding operation.
20. The bottle of claim 15, in which the closure is made of high-density polyethylene by an injection-molding operation.
